D. Mechanical & Electrical System Maintenance Costs Estimate
A proposed itemized list of prices for replacement of key components of the HVAC equipment and electrical switchgears was presented to the Board of Trustees. The work involves a like by like equipment replacement which needs minor permitting and no changes in the building structure. The total cost of the HVAC system replacement work is $1,269,000 with 20% reduction in costs if the work is performed all at once. The total cost of the electrical switchgear replacement work is $304,410. The main electrical switchgears (manufactured by Zinsco which is obsolete) located in the basement and the electrical panels, feeders, and equipment hookup located on the roof of the building is top priority for replacement work.
